

# THE DAVEN SUPER AMPLIFIER

INSURES  
THE  
FINEST  
TONE  
OBTAIN-  
ABLE!

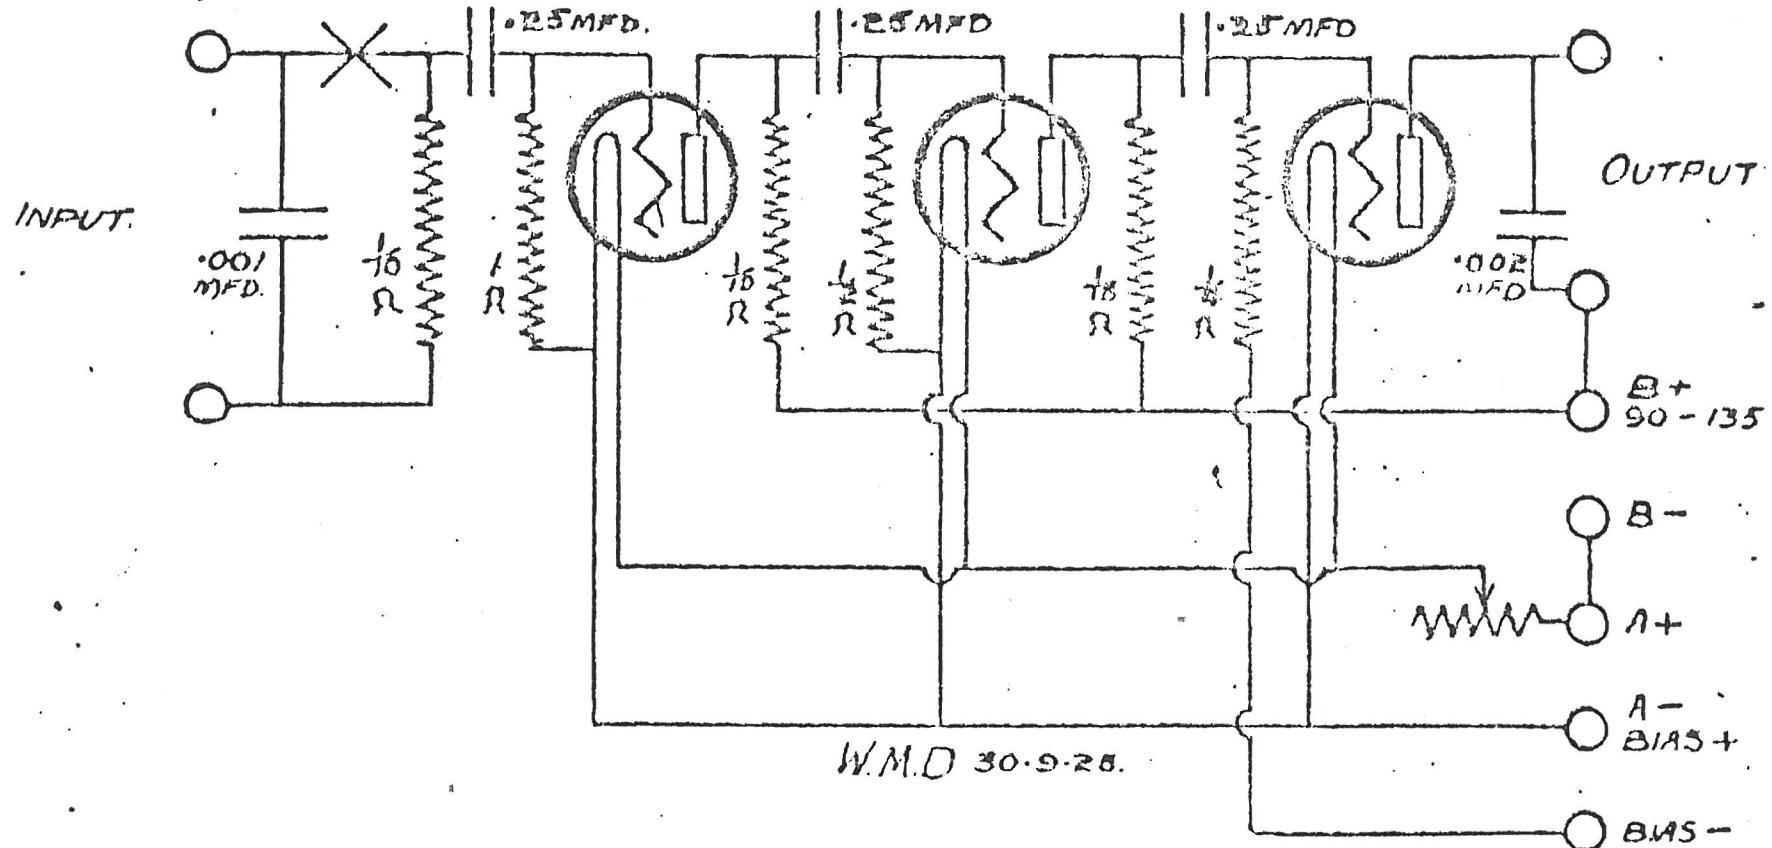

The most completely developed Resistance Coupled Amplifier on the market. Compact—base is 4in. x 10in. Complete unit, including sockets, one piece of moulded bakelite. Sockets fit all standard tubes. All Daven resistors, and the Daven Type "A" Coupling Condensers, which give 50 per cent more volume included. Should be equipped with the Special Daven Tubes. Packed in carton with complete instructions. PRICE £3/10/-.

The RESISTOR MANUAL will greatly assist builders using audio-frequency amplification. Even if you do not at present contemplate it, you should obtain this interesting handbook of valuable information on the possibilities of resistance-coupling. From your local dealer, or direct from Dept. R.

This three-valve amplifier adds no control to the set

For those who desire amplification for loudspeaker work, with a minimum of distortion, the following resistance-coupled two or three-valve unit is confidently submitted. Used in conjunction with the New Zealand Radio one-valve receiver it will magnify signals to good loudspeaker volume while preserving to the utmost the purity of the original transmission.
